# WHY SHOULD YOU COVER YOUR **AUTOMOTIVE WINDOWS**

## 3 CRITERIAS FOR YOUR AUTO FILMS:

The auto film range can be used according to your desires and also to the look you want to give to your vehicle. These films are mainly used in order to protect your vehicle from heat and UV radiations but it is also offering a burglary protection. It's the ideal solution in order to enhance your car's easthetic while protecting in the same time your kids or animals.

### TOTAL SOLAR ENERGY REJECTED

More the solar energy is discarded thanks to our films, more heat inside the vehicle will be reduced, which will allow you to keep your car cool.

CAR BODY  
PROTECTION

### GLARE REDUCTION

The higher the tint, the better the glare protection is.

### PRIVACY

The higher the number, the higher the loss of brightness.

→ You have to take into account the **visual acuity**

ANTI-THEFT  
SAFETY

ALL OUR  
FILMS PROTECT YOU  
FROM **UV RADIATIONS.**

# THE BEST FOR YOUR CAR

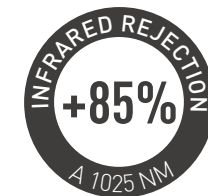

## HEAT REDUCTION

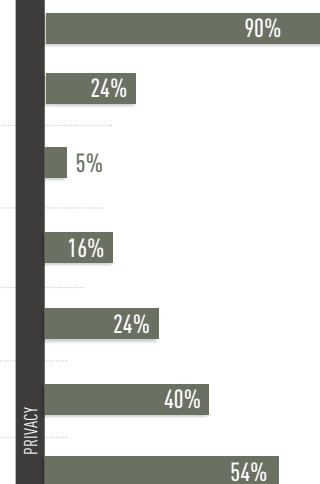

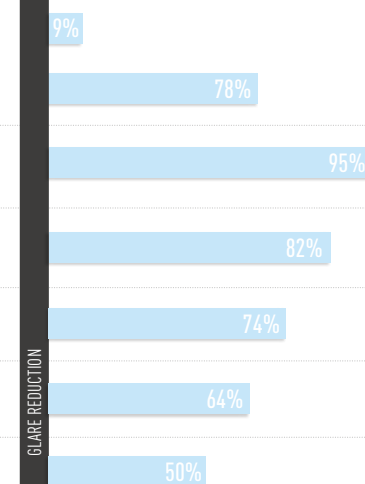

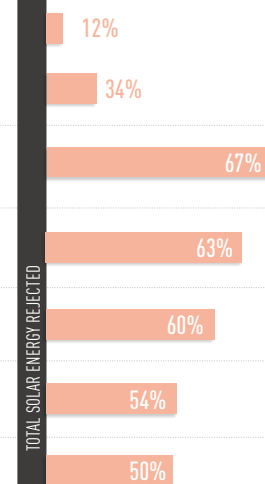

In order to reduce the heat inside your car which is mainly due to solar radiations, we are proposing you our **Beluga Range**, a high quality solar radiation protection.

A **tinted glass** just has the goal to reduce the inside car's vis-à-vis, however, it doesn't have any other specificity.

A window **tinted with our Beluga films** not only **regulates the car's vis-à-vis** but also **limits heat inside the vehicle**. It also **reinforces your windows** in order to reduce carjacking risks while absorbing 99% UV radiations.

# BELUGA RANGE

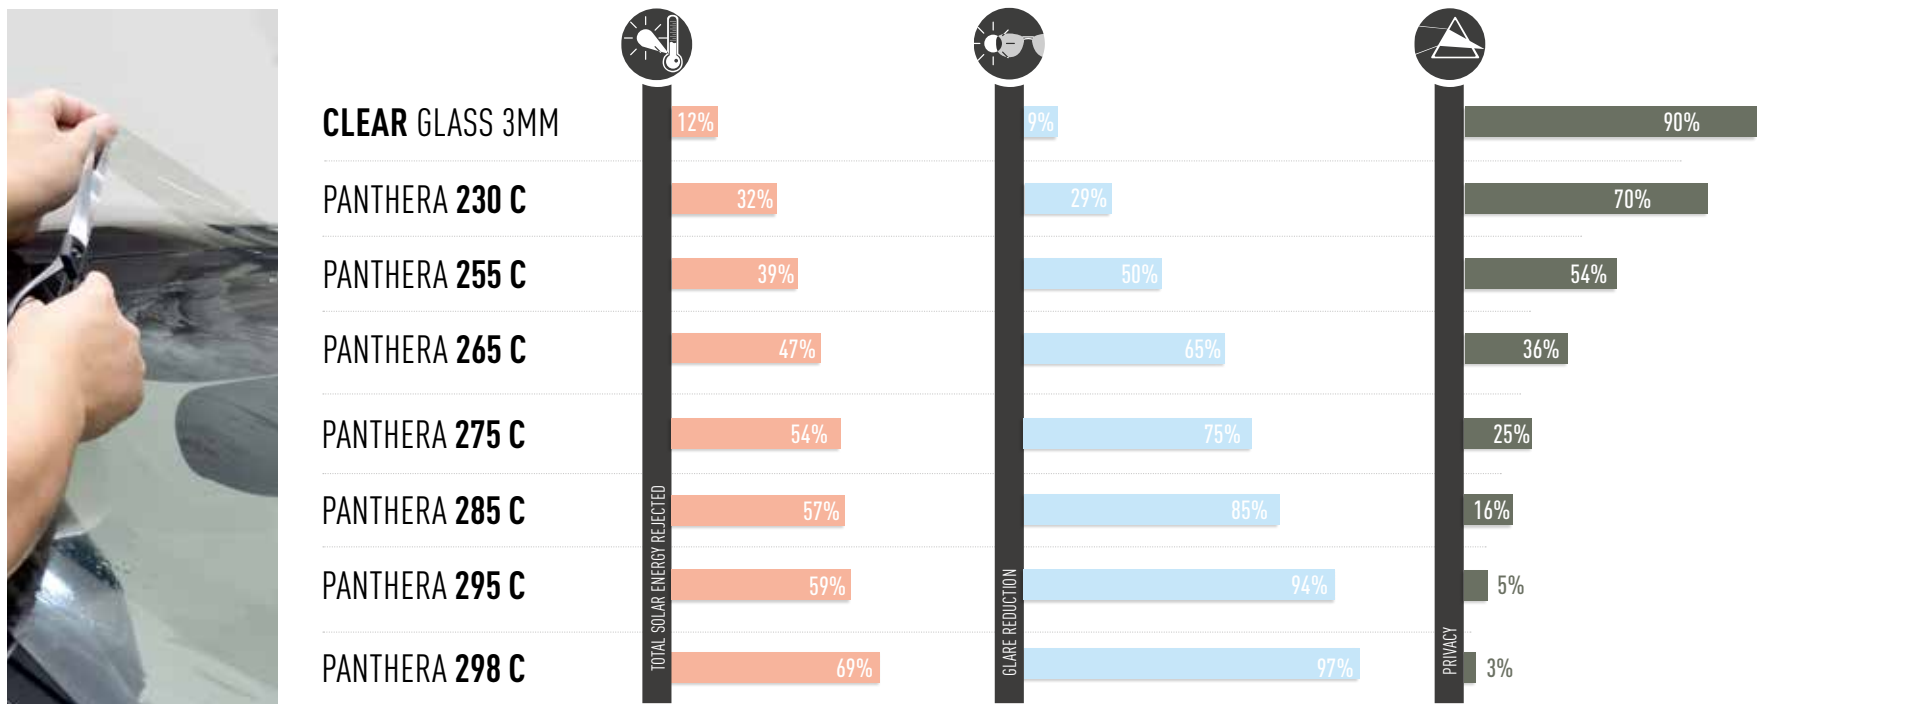

A **SAFE BET**

**STABLE OVER TIME**

The **panthera range** comes from the leading company factories in DET lamination and will satisfy you for several years, as evidenced by its exceptional warranty

**15 YEARS WARRANTY**  
 \* LIFETIME WARRANTY FOR THE FIRST OWNER OF THE VEHICLE

# THE STRENGTH OF NANOTECHNOLOGY

## DO NOT BE DISTURBED ANYMORE

Due to its metalless composition, this film prevents from all kind of interferences coming from phones or other accessories.

Coming from **nanotechnology**, this avant-garde range will offer you a great solar control thanks to its IR particles, while being neutral to frequencies.

# PROTECTION WITHOUT TINTING

## RESPECTED REGULATIONS

The **Spectra** film enhances your vision on the road, blocking heat but not sunlight. The film is not metallized and therefore, doesn't interfere with your phone.

Our road regulations require at least a 70% transparency rate on windshields. Thus, our Spectra 15 and 615 C can continue to protect you from sun rays by remaining conforming.

# NO INTERFERENCE

## HOW TO CHOOSE YOUR **FILM**?

**Color:** all colors are available in order to match the car windows to the car body color.

**Opacity:** it is measured as a percentage of external light transmission.

Coming from the same factories as our panthera range, you will find here a range with a high level of color stability, without having metal particles, and therefore without interference.

# ANTI CARJACKING

## IMPROVED SECURITY

the Omega film protects the driver and the vehicle body, while keeping the glass fragments in place in case of broken windows.

Like a net, this range of automotive films includes a thicker polyester layer (security type) in order to keep the window in one piece after a breakage or impact and therefore reduce any risk.

## FINISH & PERFORMANCE

Looking for an athermic glass appearance of a luxury sedan car ? The Sky Blue range is especially made for you!

The specific Sky Blue film composition significantly limits the sun rays transmission.  
This film allows you to limit the heat in the car, while preserving the visible light with an aesthetic touch.

STYLE IS EVERYTHING

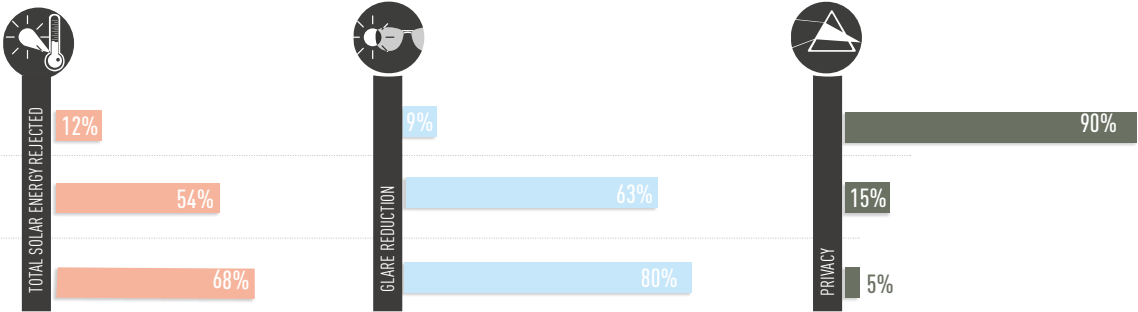

YOU WANT TO CHOOSE **THE OPACITY**  
OF YOUR **CAR FILM**?

Up to 50% shade, we can easily distinguish objects and occupants in the cabin. Between 50 to 75% and depending on the type of vehicle, the discretion will be more or less assured. Above 75%, the «dark» aspect and discretion will be guaranteed.

The darkened film for titanium windshields/windows has an attractive style, while at the same time effectively protecting you from prying eyes and sun rays thanks to its unique metal density.

ULTIMATE PROTECTION  
THROUGHOUT THE YEAR

DON'T WORRY ABOUT SCRATCHES ANYMORE

Like a second skin, the body of the car is protected from scratches thanks to our **Protector** range.

The **Protector Ultra** film is the flagship product for all amateurs who want to protect their beautiful cars bodies from daily life hazards. Resistant to weather, stone chips, UV or sand abrasion, the Protector Ultra also keeps your car's paint safe.

Thanks to its flexible polyurethane composition and its thickness, this film will dampen and protect your car from shocks and impacts. The films has also a **self-heal** characteristic in case of slight scratches.

The Protector Ultra film, due to its high quality performance, gives your car an indispensable **invisible shield**.
